WORK EXPERIENCE

Product Manager

CareerFoundry

04/2024 - 08/2024

Berlin, Germany

Achievements/Tasks

- Managed product improvements for a video conferencing software, enhancing design, performance, and features from discovery to post-launch.
- Defined product vision, strategy, and the roadmap, gathered and prioritized requirements, analyzed market trends and customer feedback, and drove the overall product lifecycle to meet business goals and customer needs.

Business Analyst

Cotvec Ltd.

03/2019 - 06/2022

Minsk, Belarus

Achievements/Tasks

- Gathered and analyzed business requirements, defined and documented functional and non-functional requirements (BRD, SRS, user stories), optimized processes (BPMN, UML), collaborated with stakeholders and development teams, prioritized features, supported system integration and testing, ensuring solutions align with business needs and regulatory standards.
- Developed a new card product, increasing usage by 20% and retention by 15% through a bonus points system, virtual card option, and optimized backend processes.
- Streamlined payment processing by aligning systems with ISO20022, reducing errors and enhancing regulatory compliance.
- Enhanced AML system, refining the interface and developing a risk-based questionnaire, leading to a 25% reduction in flagged transactions.
- Improved customer satisfaction and reduced post-launch bugs through rigorous analysis and QA/UAT.

Lead Economist

BPS-Sberbank OJSC - Methodology Department

10/2010 - 01/2019

Minsk, Belarus

Achievements/Tasks

- Streamlined credit processes, reducing processing time by 15% through document development and updates.
- Enhanced employee competency with targeted training programs, reducing operational errors.
- Spearheaded loan process automation, integrating SAP LM, CRM, and IBM FileNet, reducing manual workload.
- Improved loan processing efficiency through system requirements development and testing.
